File Utility Suite - Feature Roadmap

Proposed capabilities for a cross-platform file and document utility

File conversion

- Images: PNG, JPG, JPEG, WEBP, BMP, TIFF, GIF, ICO, SVG
- PDF to/from TXT, DOCX, PPTX, HTML, and images
- DOC, DOCX, ODT to/from PDF
- PPT, PPTX, ODP to/from PDF
- XLS, XLSX, ODS to/from PDF
- DOCX to/from ODT; PPTX to/from ODP; XLSX to/from ODS
- Markdown to/from HTML and PDF
- JSON to/from CSV, YAML, and XML
- XML to/from JSON and CSV
- Batch conversion, output folder selection, filename templates
- Overwrite, rename, or skip output conflict options
- Conversion progress, cancellation, history, and retry

PDF tools

- Merge PDFs, split PDFs, and extract selected pages
- Reorder, rotate, delete, and preview pages
- Compress PDFs and export PDF/A
- Add/remove passwords and manage permissions
- Add watermarks, headers, footers, and page numbers
- OCR scanned PDFs
- Edit PDF metadata and support digital signatures
- PDF thumbnails and visual page preview

Microsoft, LibreOffice, and Google compatibility

- Auto-detect Microsoft Office and LibreOffice installations
- Select the preferred conversion backend and show its version
- Microsoft Word, PowerPoint, and Excel automation
- LibreOffice headless conversion across Windows, macOS, and Linux
- Google Docs, Slides, and Sheets export workflows
- Google Drive integration with OAuth
- Preserve fonts, tables, images, hyperlinks, and layouts where possible
- Warn clearly when formatting may be lost

Document utilities

- Word count, page count, text extraction, and metadata inspection
- Find and replace and basic formatting cleanup
- Document comparison
- Font and image extraction
- Spell-check integration
- Template-based document generation

Presentation utilities

- Slide preview and slide thumbnails
- Export slides to PDF, PNG, or JPG
- Merge, split, reorder, and remove slides
- Add speaker notes and extract presentation text

File Utility Suite - Feature Roadmap

Proposed capabilities for a cross-platform file and document utility

Presentation utilities (continued)

- Create presentation contact sheets
- Preserve animations and transitions when supported

Spreadsheet utilities

- XLSX, CSV, and ODS conversion
- Merge spreadsheets and split worksheets
- Export selected sheets to PDF
- Remove duplicate rows and select columns
- CSV delimiter and encoding controls
- Formula preservation warnings
- Basic sorting, filtering, and spreadsheet preview

File management

- Folder organization by file type and recursive organization
- Preview changes and undo the last operation
- Batch rename with templates
- Find duplicate files, large files, empty files, and empty folders
- Checksum generation
- Secure file deletion
- Create and extract ZIP, TAR, and 7Z archives
- File metadata viewer and recent locations

Image utilities

- Resize, crop, rotate, flip, and compress images
- Change quality and add watermarks
- Remove metadata and create thumbnails
- Convert transparent backgrounds
- Batch image processing and contact sheet creation

User experience

- File drag-and-drop and multi-select support
- Clear select -> choose action -> choose output -> execute workflow
- Search and filter actions
- Progress bar, cancel button, and conversion preview
- Dark/light themes and keyboard shortcuts
- Accessible labels, navigation, localization, and tooltips
- Remember last-used settings
- Actionable error messages and activity log export

Safety and reliability

- Never overwrite without confirmation
- Automatic backups and temporary conversion workspace
- Atomic output writes and generated-file validation
- Recovery after failed conversions
- Permission and disk-space checks
- Optional virus-scan integration

File Utility Suite - Feature Roadmap

Proposed capabilities for a cross-platform file and document utility

Safety and reliability (continued)

- Privacy mode for temporary files
- Clear handling of unsupported or password-protected files

Advanced features

- Command-line interface
- Watch folders and scheduled conversions
- Custom conversion profiles and presets
- Plugin system and API integration
- Cloud storage support
- Portable mode and auto-update support
- Cross-platform installers
- Usage analytics disabled by default

Recommended implementation priorities

- PDF merge, split, compress, and page management
- Drag-and-drop support with progress and cancellation
- Batch rename and duplicate-file detection
- Office backend selection and installation diagnostics
- OCR and scanned-document support
- Conversion history, retry, and recovery
